## **DETAILED ACTION**

### ***Application Status***

1. Applicant's election without traverse of Group I (claims 1-19, starter unit (methylthio) acetyl CoA and polyketide 15-methyl-6-dEB) is acknowledged.

### ***Claim Disposition***

2. Claims 1-20 are pending. Claims 1-19 are under examination. Claim 20 is withdrawn from further consideration pursuant to 37 CFR 1.12(b), as being drawn to a non-elected invention, there being no allowable generic or linking claim.

### ***Specification***

3. The specification is objected to because of the following informalities:

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following is suggested: "Recombinant Host Cells Comprising Starter Units and Methods of Making a Polyketide".

Correction is required.

### ***Information Disclosure Statement***

4. The Information Disclosure Statement filed on January 30, 2004 has been received and entered. The references cited on the PTO-1449 Form have been considered by the examiner and a copy is attached to the instant Office action.

***Drawing***

5. The Drawings filed on July 15, 2003 have been accepted by the examiner.

***Basis For NonStatutory Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 1656

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,627,427. An obvious-type double patenting rejection is appropriate where the conflicting claims are not identical, but an examined application claim is not patentably distinct from the reference claim(s) because the examined claim is either anticipated by, or would have been obvious over, the reference claim(s). See *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); and *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985). Although the conflicting claims are not identical, they are not patentably distinct from each other.

The instant application claim is directed to a recombinant host cell capable of making a polyketide using a starter unit. The patented claim is directed to a recombinant *S. erythracea* host cell that makes 15-methyl-6-deoxyerythronolide the host cells directed to a polypeptide having modifications resulting from substitution in a sequence set forth in SEQ ID NO:3. The claims differ in that the patented claims recite the name of the cell, however, the two sets of claims are obvious variations of each other, because the patented claims are a species from the genus claimed in the application.

Art Unit: 1656

Thus, the instant claims are an obvious variation of the patented claims, therefore *prima facie* obvious.

This is an obvious-type double patenting rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

8. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Long et al. (Molecular Microbiology, vol. 43, no. 5, pages 1215-1225, 2002).

Long et al. a starter unit used to produce a polyketide in a microorganism (host cell) and the engineering involved in the specificity of the starter unit (page 1215).

Therefore, the limitations of the claim is met by this reference.

### ***Conclusion***

9. No claims are allowable. Claims 2-19 are objected to as depending from a rejected based claim.
